COMMENTS

1.	Excellent questions to have more discussion
2.	Putting our Firefighters' safety is first and foremost. Our current fire stations are outdated and not up to current standards , for too many years the Township has been throwing money at these stations to keep them running. The current council made a decision to move forward and that's what needs be done. In the best interest of the Township a centrally located station has been proven, through reports from the Chief, to be the best location to best service the Township. I would like to see more education provided to the residents of Wainfleet, not everyone knows the current state or the amount of money it would take to bring those stations in line with current standards. I think that if people knew the state of these buildings any doubts people might have would change.
